

# Adding a Language to Content

1. Create or select the item you want to add a language version to.
2. Once you have the item open in the Content Editor, click the language dropdown menu and select the language version you want to add (Figure 1).

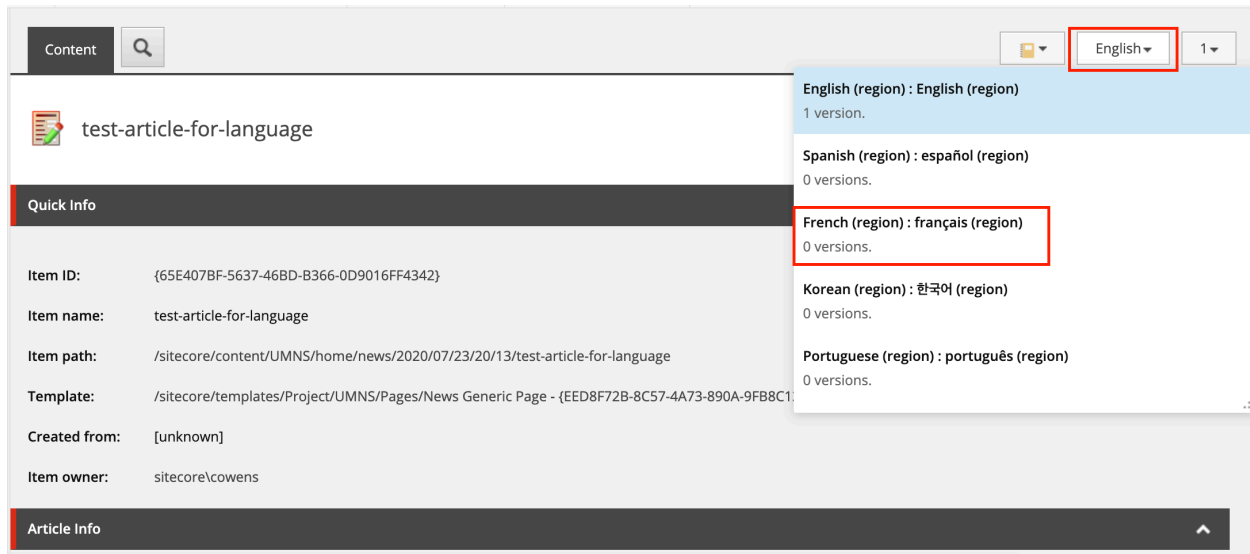

Figure 1

3. Once the language you selected comes into view a yellow indicator box will show up at the top of the page indicating that there is no version in this language. Click 'Add a new version' to add a version of the language you are wanting to edit and create (Figure 2)

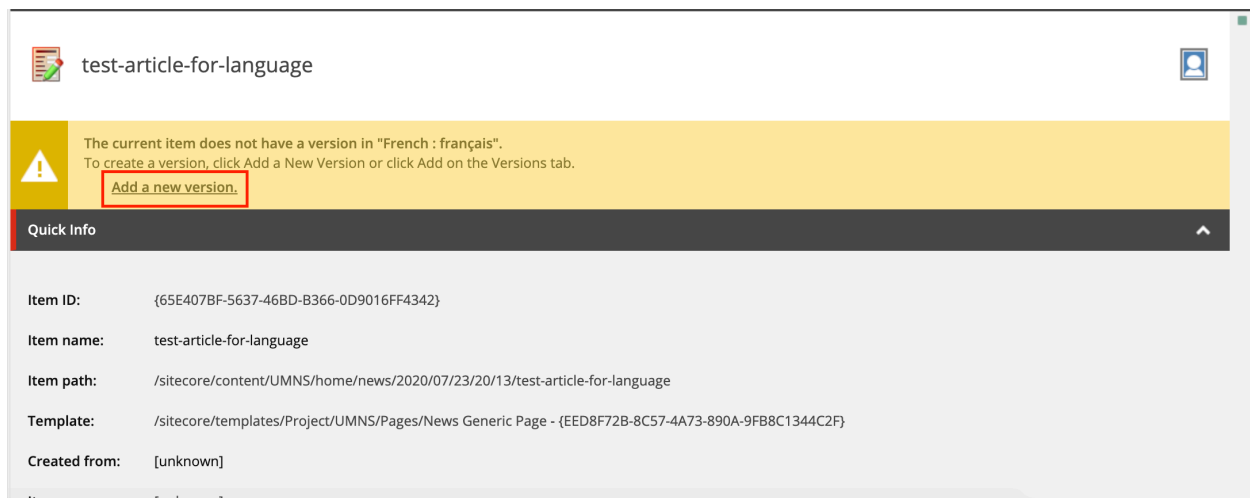

Figure 2

4. Add the content that you want for this language. Once you are finished, click **Save** and **Publish > Publish item**. In the Publishing Item dialog box, select the language you were working on and the proper checkboxes to publish. Then click **Publish**.
